

# Grow Your Export Sales

## WITH SUPPORT FROM THE U.S. GOVERNMENT

**"Made in USA"** is a mark of quality worldwide, and the sale of American exports should be booming. Unfortunately, extending credit to buyers and accessing working capital are major barriers to global growth for many manufacturers.

### Fortunately, there is a solution.

The **Export-Import Bank of the United States (EXIM)** helps American manufacturing companies overcome finance obstacles. EXIM is a federal government agency that enables U.S. businesses of all sizes to win and grow their international sales in more than 180 countries.

EXIM is a critical tool for U.S. manufacturers to remain competitive in a tough and challenging global economy. Manufacturers comprise half of EXIM's total export support. More than 90 percent of EXIM's transactions directly support small businesses. No deal is too small.

### EXIM Support for U.S. Manufacturers is Extensive!

**Provide open account credit terms** — Payment in advance deters sales because it adversely affects the buyer's cash flow. Foreign buyers expect credit (net 30, net 60, etc.). With EXIM support, U.S. manufacturers can confidently provide payment terms of up to 180 days.

**Protect against buyer nonpayment** — EXIM's export credit insurance reduces the risk of not getting paid due to commercial (e.g., bankruptcy) and political risks (e.g., war). If your buyer doesn't pay, EXIM could pay you up to 95 percent of your invoice.

**Expand your borrowing capacity** — You can assign your EXIM-insured foreign receivables to a lender, improving your company's liquidity and easing cash flow constraints.

**Access vital export funding** — EXIM provides a 90 percent loan guarantee that encourages lenders to provide credit to manufacturers. The funds can be used to fulfill sales orders as well as cover labor and overhead costs. EXIM can also help your bank set up standby letters of credit to be used as performance or bid bonds.

**Assist buyers to obtain term financing** — EXIM's lender loan guarantee gives them the assurance to provide loans to foreign buyers for purchasing U.S. capital goods and related services. With this support, the exporter gets paid in full upon shipment. The buyer can typically obtain lower interest rates and longer repayment terms.

*Boost your sales while protecting your cash flow.
